14 There are only red sweets and yellow sweets in a packet.

There are 2 more red sweets than yellow sweets in the packet.

There are more than 5 sweets in the packet.

Amber is going to take at random two sweets from the packet.

The probability that Amber will take two sweets of the same colour is $\frac{19}{40}$

What is the number of yellow sweets in the packet?

[6 marks]

Answer _____
